

Optio Micro – LED lantern

What does it do?	Product images:
<p>Designed with the real world in mind, the new Optio Micro lantern from TRT Lighting offers workable on-site solutions. Our designers were led by how this lantern and its features could be used in situ and what benefits it could bring.</p> <p>Optio Micro has been created to provide for multiple stakeholders with easy fit shields to address light spill, and multiple CCTs to suit the requirements of ecologists and ecologically sensitive areas.</p> <p>Designed specifically for residential street lighting applications, the Optio Micro LED lantern has been developed to not only embrace the latest technologies available but to also take into consideration the feedback and input from our valued and knowledgeable customers.</p> <p>With unrivalled levels of flexibility, adaptability and choice, the Optio Micro provides effective and efficient solutions for installation today, whilst also considering the circular economy of the future.</p>	 
Key technical features:	
<ul style="list-style-type: none"> • Upgradeable Light Engine • Interchangeable LED Modules • PowerSet - innovative power selection module • CMS ready 	<ul style="list-style-type: none"> • MountSet - enabling the Optio Micro to be mounted onto a wide array of column and bracket sizes without the need for additional reducers or inserts
How will it help / solve issues / add value?	
<ul style="list-style-type: none"> • Circular Economy Design – designed to be maintained - all key components can be easily replaced with maximum component re-use - the “most circular economy ready” lantern we are aware of. • Future ‘ready’ – with the option of Zhaga Book 18 (SR) sockets, top and bottom. Simple upgrade options with minimal future costs - the lantern is designed so that upgrades can be achieved quickly and cost effectively (gear and LEDs) – with the addition of options for onsite power adjustment of gear and LED output. • Adjustable – allowing installations to be optimised and operatives to carry out varied lantern replacements if needed with lanterns they carry – especially with the variety of mounting options available. • Compact & lightweight – discrete and unobtrusive to the ‘street-scape’ - smaller in size to suit existing column and bracket infrastructure.
